

Solyanka Lineups (Example from October 2021)

I want to tell you about an interesting opportunity for a successful deal. I don't think that this guy will constantly help you take prizes, but he can bring you 0.01-0.015 ETH (for rare card) in the near future.

Aleksey Ionov is a very versatile player. He has already played left and right attacking mid / forward and even «false 9» in this season. Ionov spent on the field 45 minutes in the cup match this week, but the market has hardly reacted to it yet. In recent matches, Viktor Claesson didn't play very well and Ionov may well replace him.

Krasnodar attacks a lot, even in games against strong opponents, so the chance that Ionov will score or make an assist in the next 1-2 games is quite high. His price is low, so if you count as a percentage, then it can easily skyrocket by 20-30 percent this or next weekend. On Saturday Krasnodar plays against Krylia Sovetov, this is a team with not the best defense.

Generally speaking, Ionov may also return to the Russian national team. He has a very good relationship with the head coach of Russia (Karpin), because they worked successfully together. It is significant that after the appointment of Karpin to the Russian national team, Ionov (before his injury) was a starter in a very important game against Croatia and in a simple match against Malta.

Ionov's contract is valid until the summer of 2023, most likely this is the last big contract in his life, so he has no plans to leave. In the near future, we don't have a chance to see a red cross next to his card, which is already good when we talk about older players.

Conclusion

We have a very cheap player with the prospect of becoming a starter in the club and in the national team. Its price is so low that it has practically nowhere to fall, only pure DNP's are cheaper. In the worst case scenario, you will receive your profit in the spring, not in a couple of weeks. In my opinion, this is a good reason to take a chance if you have extra ETH.
